Georgia Hobson

Profile — Web Developer and Marketer

Full stack web developer With a background in Marketing and extensive client handling experience. My drive and intrigue for coding inspired me to achieve an A- certificate in web development through the University of Birmingham. As a result I have now written applications using a variety of technologies including; React.js, Node.js, JavaScript, MySQL, MongoDB, Git, Command Line, JQuery, CSS, Bootstrap, Express.js, HTML5.

My ambition and drive to be successful in web development saw me complete this course while retaining full time employment. This experience in client facing industries, most recently while working from home has required discipline and strong time management. My exceptional quality assurance score and attendance record evidence this. Coupled with my recent success at Birmingham my marketing acumen makes me a user focused developer I'm looking forward to taking advantage of opportunities both domestically and internationally that will see me add specificity and nuance to my code.
